

### Simple Ethnography observations sheet.

Simple Ethnography is a Liberating Structure that involves observing people very closely. You are going to observe your colleague participants when they are engaging in the first Liberating Structure of this workshop: Impromptu Networking.

Please record as much and detailed observations as you can, about:

People's facial expressions?

People's body language?

The way time is being used and switching between pairs?

If you would take a birds-eye view of the room, how are people and groups positioned? (maybe a draw ; )

What else are you noticing?
